

Useful keyboard shortcuts

This page provides an overview of keyboard shortcuts that can help you use your desktop and applications more efficiently. If you cannot use a mouse or pointing device at all, see [Keyboard navigation](#) for more information on navigating user interfaces with only the keyboard.

Getting around the desktop

Super key	Switch between the Activities overview and desktop. In the overview, start typing to instantly search your applications, contacts, and documents.
Alt+F2	Pop up command window (for quickly running commands). Use the arrow keys to quickly access previously run commands.
Super+Tab	Quickly switch between windows . Hold down Shift for reverse order.
Super+	Switch between windows from the same application, or from the selected application after Super+Tab . This shortcut uses  on US keyboards, where the  key is above Tab . On all other keyboards, the shortcut is Super plus the key above Tab .
Alt+Esc	Switch between windows in the current workspace. Hold down Shift for reverse order.
Ctrl+Alt+Tab	Give keyboard focus to the top bar. In the Activities overview, switch keyboard focus between the top bar, dash, windows overview, applications list, and search field. Use the arrow keys to navigate.
Super+A	Show the list of applications.
Super+Page Up and Super+Page Down	Switch between workspaces .
Shift+Super+Page Up and Shift+Super+Page Down	Move the current window to a different workspace .
Shift+Super+←	Move the current window one monitor to the left.
Shift+Super+→	Move the current window one monitor to the right.
Ctrl+Alt+Delete	Show the Power Off dialog .
Super+L	Lock the screen .
Super+V	Show the notification list . Press Super+V again or Esc to close.

Common editing shortcuts

Ctrl+A	Select all text or items in a list.
Ctrl+X	Cut (remove) selected text or items and place it on the clipboard.
Ctrl+C	Copy selected text or items to the clipboard.
Ctrl+V	Paste the contents of the clipboard.
Ctrl+Z	Undo the last action.
Ctrl+Shift+C	Copy the highlighted text or commands to the clipboard in the Terminal.
Ctrl+Shift+V	Paste the contents of the clipboard in the Terminal.

Capturing from the screen

Print	Launch the screenshot tool .
Alt+Print	Take a screenshot of a window .
Shift+Print	Take a screenshot of the entire screen .

	Start and stop screencast recording.

More Information

[Applications and windows](#)

[Keyboard](#) — Select international keyboard layouts and use keyboard accessibility features.

[Tips & tricks](#) — Get the most out of GNOME with these handy tips.

See Also

[Keyboard navigation](#) — Use applications and the desktop without a mouse.

[Set keyboard shortcuts](#) — Define or change keyboard shortcuts in Keyboard settings.

[What is the **Menu** key?](#) — The **Menu** key launches a context menu with the keyboard rather than with a right-click.

[What is the **Super** key?](#) — The **Super** key opens the Activities overview. You can usually find it next to the **Alt** key on your keyboard.

You can choose the **displayed language** by adding a language suffix to the web address so it ends with e.g. `.html.en` or `.html.de`.
If the web address has no language suffix, the preferred language specified in your web browser's settings is used. For your convenience:
